Calling all Photography Section Members! Please join us for our first photo social event. We will gather at the home of Nancy Duplan at 8:00 a.m. for a continental breakfast. There you will receive a map of the area outlined with special places of great fall color. In the event that this year has little color to offer, the area of the Lower Blue River has other great areas of photo interest. There are several old barns in the area, old bridges, the Blue River itself, and of course, the wonderful Gore Range. There is an easy hike to Cataract Lake of approximately two miles round trip. Usually there is wonderful color there because the lake is surrounded by Aspen. At the end of the lake, there is a waterfall. All these will be noted on the maps.

The home where we will meet is about 13 miles north of Silverthorne. Driving time from the AMC Building is about 65 minutes. After a great morning of photography, we will reconvene at about 2:00 p.m. for a potluck. The main dish will be provided and there will be a sign up for salads, breads, drinks and desserts.

Please RSVP early to Frank’s email at fburzynski@comcast.net, place potluck on the subject line and indicate if you will bring salad, bread, dessert or drinks. Planning is important for the success of the event. That is why we are asking you to consider this early and let us know. When we get a confirmation of attendance we will send driving directions. Should we be light on any food items we may ask for an adjustment on your potluck contribution. Purchased ready-made salads and desserts are acceptable.
IMPORTANT CHANGE and Call FOR MACRO IMAGES  
(Reminder to bring your camera to the next meeting!)

For the month of September only, the Photography Section Meeting will move to a new room and date. The meeting in September will be held September 19th at 7:00 p.m. in the Baker classroom at the American Mountaineering Center in Golden.

The shooting theme for September is Macro photographs. Please send your images to Frank at fburzynski@comcast.net with Macro in the subject line by Sunday, September 16th.

Also: Instead of a presentation we will gather in small groups with our cameras and discuss settings, features, tips, and advantages of our favorite gear. We will break into small groups with similar equipment and discuss how we use the features and capabilities of the camera for nature photography and pose questions to each other as to how to adapt to different environmental variables.
