**Shooter’s Choice 2021**

**Volunteers Needed**

For 2021, the CMC photography section is asking for volunteers to present Shooter’s Choice.

Shooter’s Choice involves selecting a set of photographs from a hiking trip, vacation, or any outdoor experience and presenting them to the group.

As you are presenting each photograph, you can include why you liked the image, how you composed it, any challenges you encountered while taking the photo, and techniques that you used (e.g. tripod, time of day, filters, aperture, shutter speed etc).

It’s not necessary to be an advanced photographer to present a Shooter’s Choice. All skill levels are invited to participate. It’s optional, but you can ask for feedback from the advanced photographers in the group. It’s a great way to improve your photography skills.

We look forward to seeing your photographs.

Please contact Karen Theesen at rmhfun@hotmail.com if you are interested.
January 13th Meeting
Stan Paxton

Join us for a presentation by geologist Stan Paxton.

The Art and Science of Repeat Photography

Oklahoma’s Oil Giant – Cushing Field
About Stan

Stan Paxton has been an avid landscape photographer since 2000. A geologist by training, his photographic interests include capturing patterns in nature at different scales. Interest in repeat photography was kindled by attempts to document local changes in the geometry of modern river systems in response to rainfall-runoff and hydrologic discharge events. This experience ushered in a greater personal interest in the art and science of repeat landscape photography. Stan and his wife Mary Lou have lived in the Golden-Lakewood Colorado area since 2015.

About The Presentation

Repeat photography is one approach to documenting landscape change and ecosystem processes. However, repeat photography can be more than simple logistics of place or the mechanics of capturing an image once you arrive. This presentation will explore the use of repeat photography as an avenue for walking in the footsteps of past artists, photographers, and scientists. In the process, we have an opportunity to think about the motivations and strategies behind their work. In the realm of landscape photography, repeat photography can serve as a vehicle for improvements to our selection of photographic subject matter and composition.
In the 108 years since its founding, the CMC has weathered some serious storms—two world wars, Spanish Flu, the Great Depression, the Vietnam War, the Cold War. These events were separated by decades, but they had something in common: the CMC survived each of them because of our dedicated community. Now we are in a new storm - the novel Coronavirus Pandemic. And we need your help. Will you help us weather this storm?

Website Recommendations by Members

lightstalking.com Tips and tutorials, feedback, and downloadable photo goodies.

essential-photoshop-elements.com Photoshop Elements 13 tutorials by Rick Peterson

divephotoguide.com Contains photos, trips and photo techniques by Matt Weiss. While it is written for underwater photographers, it is quite well done and some of the information is universal.

lenscratch.com A very good comprehensive website about photography. They have a new photographer every day, plus much more, including online exhibitions that you can be a part of, links to other websites, and shows to enter. It has constantly rated as one of the best websites for photography in the world.

photoeye.com/bookstore/index.cfm Photoeye Book Store, a great site about all sorts of photo books, one of the best for this subject.

muybridgeshorse.com Muybridge’s Horse is a newer website devoted to animal photography and art. The young woman who started it went to school at CU.

newlandscapephotography.com New Landscape Photography is just that—a site about landscape photography. It has a new photographer once or twice a week and is also a Facebook group where anyone can upload photos.

featureshoot.com/2014/02/52-photo-sites-get-inspired/#vkVXB Feature Shoot, with a list to 50 more.
